PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 1+ year building scalable web applications using React, Next.js, Node.js, TypeScript, and MongoDB. Delivered 60% faster backend setup via AI-powered API generation and improved application performance by 35–40% through systematic optimisation. Agile-experienced with a strong analytical mindset; passionate about writing maintainable, production-ready code and driving innovation through data-driven decisions.

EDUCATION

Thakur College of Engineering and Technology
B.E. in Electronics & Telecommunication Engineering | CGPA: 8.09

Mumbai, India
2022 – 2026

PROFESSIONAL EXPERIENCE

Freelance React Developer

January 2025 – Present

Self-employed

Remote

- Built 5+ client websites using React and TypeScript, reducing development time by 30% through modular component reuse and standardised design patterns.
- Created RESTful APIs with Node.js/Express and MongoDB, architecting endpoints that handle 1,000+ daily requests with 99.9% uptime.
- Optimised MongoDB query performance and caching strategies, cutting average API response times from 2.5s to 1.5s (40% improvement).
- Implemented workflow improvements that enhanced application performance and usability by 35%, validated through structured functional testing and client feedback.

PROJECTS

Orchestrix | *Next.js, TypeScript, MongoDB, Motia, RESTful APIs*

Oct 2025 – Dec 2025

- Built an AI-powered Next.js application that translates natural-language inputs into structured JSON specifications and RESTful APIs, reducing backend setup time by **60%**.
- Designed a **dynamic API generation layer** with TypeScript type-safe interfaces, improving development consistency and operational efficiency by 40%.
- Defined and documented API standardisation requirements including system workflows and technical specifications, streamlining cross-team integration.
- Implemented JWT authentication and deployed on Vercel with **CI/CD via GitHub Actions**, maintaining 99.9% uptime.

Hospibot | *Next.js, Node.js, MongoDB, LangChain.js*

Aug 2025 – Sep 2025

- Built an AI-powered hospital management chatbot using LangChain.js and MERN stack, serving **500+ monthly interactions** with a 90% task-completion rate.
- Designed ERP module specifications covering resource allocation and performance tracking, integrated with **role-based access control (RBAC)** and JWT authentication.
- Reduced response latency by **60%** through optimised MongoDB query design and LangChain prompt-chain caching.
- Validated system reliability through scenario-based functional testing covering edge cases and concurrent user flows.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C++, HTML, CSS

Frameworks: React.js, Next.js, Node.js, Express.js, FastAPI, LangChain.js, Tailwind CSS, JWT

Databases: MongoDB, MySQL, Firebase Firestore, Supabase

DevOps / Cloud: GitHub Actions (CI/CD), Vercel, AWS EC2 (basic), Firebase Hosting, Docker (basic)

Testing: Jest, React Testing Library, Postman (API testing), Cypress (basic)

Tools: Git, GitHub, VS Code, Postman, Figma, Jira/Trello (Agile/Scrum)

Concepts: RESTful API Design, JWT/OAuth, RBAC, System Design, Requirement Gathering, Data Structures & Algorithms
